b

$$c) F = xy'z + x'y'z + w'xy + x'y + wxy$$

$$F = y'z(x+x') + xy(w'+w) + x'y$$

$$F = y'z + xy + x'y$$

$$F = y'z + y$$

$$F = (y+y')(y+z) = y+z$$

d)

y	z	y+z	F
0	0	0	0
0	0	0	0
0	1	1	1
0	1	1	1
1	0	1	1
1	0	1	1
1	1	1	1
1	1	1	1
0	0	0	0
0	0	0	0
0	1	1	1
0	1	1	1
1	0	1	1
1	0	1	1
1	1	1	1
1	1	1	1

as we see "F" is the final result of the original

Boolean gates system, the original and the new upgraded gates systems result same so that's mean it's true

e)

we have been used 9 gate in the first system and now we just using 1 gate in this system that's cool :)
